## INTRODUCTION

The nineteenth annual report, issued by the Federal Railroad Administration (FRA) Office of Safety, combines Highway-Rail Crossing Accident/Incident statistics with the National Highway-Rail Crossing Inventory. Accident/Incident data is compiled from monthly reports filed by railroads. The National Highway-Rail Crossing Inventory contains sight-survey data about individual crossings and is provided voluntarily by states and railroads.

The Federal Railroad Safety Act of 1970 (P.L. 91-458) and the Accident Reports Act (45 U.S.C. 38-34) require railroads to file accident/incident reports with the FRA. The National Highway-Rail Crossing Inventory was developed in response to the Federal Railroad Safety Act of 1970 and the Federal Highway Safety Acts of 1970 and 1973, which require the Secretary of Transportation to work towards improving safety at highway-rail crossings.

$$
* * * * * * *
$$

Tables and figures retain the number identification used in prior years. Information on accidents/incidents and crossings is presented in the following sequence:

Historical data on highway-rail crossings accidents/incidents at public crossings.
Summary of 1996 accidents/incidents that occurred at public crossings sites.
Physical and operational statistics for all public at-grade highway-rail crossings as described in the inventory on July 19, 1997.

Summary of 1996 accidents/incidents occurring at private highway-rail crossings and tabulations of private crossings in the inventory.

The tables and figures in Sections $\mathbf{1 , 2 , 3 , 5}$, and Appendix $\mathbf{C}$ furnish data on public highway-rail crossings; although tables 33 and 34 in Section 4 include counts of the number of private crossings. The majority of the accident tables and charts shown in this bulletin provide information on motor vehicle accidents. Those tables and figures that do not refer to motor vehicle in their title contain data for all accidents/incidents.

# 1992/3 ACCIDENT PREDICTION AND RESOURCE ALLOCATION PROCEDURE CONSTANTS 

The U.S. DOT Highway-Rail Crossing Resource Allocation Procedure, described in the Rail-Highway Crossing Resource Allocation Procedure User's Guide, Third Edition, DOT/FRA/OS-87/10, August 1987, uses three "normalizing constants" in the accident prediction formulas, Formula A, Section 3.2.4, Page 17. These constants have been adjusted periodically in order to keep the formulas matched with current accident trends. The last readjustment was made for Calendar Year 1992 and was published in Bulletin No. 14.

The process of determining the three (3) current normalizing constants for 1992 was performed so that the sum of the December 1991, predictions using only accident history data for Calendar Years 1986 to 1990 for the top 20 percent of each of the three classes of crossings (gates, flashing lights, passive) for the respective three formulas is made equal to the actual number of accidents that occurred for those same crossings in 1991. This process was performed for each of the three warning device groups, (1) passive, (2) flashing lights, and (3) gates.

These constants were redetermined for the "national" model using the crossings in the inventory as of December 31, 1991. Organizations using the "DOT Model" should update their models by replacing the old constants with the recalculated constants. The constants referenced here are located in the computer program ACPD.NEW as shown in the coding at the top of page A-4, Appendix A1 of the User's Guide Third Edition and in RESAL.NEW on page B-3, Appendix B1.

These constants will be used in fulfilling requests for accident prediction and resource allocation procedure listings. The table below lists the current and prior constants.

## ACCIDENT PREDICTION AND RESOURCE ALLOCATION PROCEDURE NORMALIZING CONSTANTS

| WARNING DEVICE GROUPS |  | $\begin{aligned} & \text { CURRENT } \\ & 1992 \end{aligned}$ | PRIOR YEARS |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1990 | 1988 | 1986 |
| (1) | Passive |  | . 8239 | . 9417 | . 8778 | . 8644 |
| (2) | Flashing Lights | . 6935 | . 8345 | . 8013 | . 8887 |
| (3) | Gates | . 6714 | . 8901 | . 8911 | . 8131 |

The Resource Allocation Procedure is currently being reviewed and, if merited, may be revised. (This project is one of 55 actions identified within the Department of Transportation's recently released Highway-Rail Crossing Safety Action Plan.) As such, recalculation of the "normalizing constants" for the existing accident prediction formulas has been deferred until this review is complete. Users of the "DOT Model" should continue to use the 1992 constants detailed above.

Note: Al totals on this table are slightly higher than those shown on other tables. The reporting rul es require that when an antrak train is bei ng operated by a crew of another railroad, both Antrak and the operating carrier must make a report of an accident/inci dent. In al ot her tables these acci dents/inci dents are only counted once.

## APPENDI X A

## REPORTI NG

## REQUI REMENTS

AND

DEFI NI TI ONS

## ACCI DENT/ I NCI DENT REPORTABI LI TY REQUl REMENTS

The rul es governing monthly reporting of railroad acci dents/incidents in effect in 1992 define a reportable acci dent/incident as an event arising fromthe operation of a railroad that results in one or more stated circumstances.
(a) An i mpact occurs bet ween railroad on-track equi prent and an aut ombile, bus, truck, mot orcycle, bi cycle, farmvehicle, pedestrian or other hi ghway user at a hi ghway-rail crossings.
(b) Any collision, derailment, fire, expl osi on, act of GOD or ot her event i nvol ving the oper ation of railroad on-track equi prent (standi ng or moving) whi ch results in more than $\$ 6,300$ in damages to railroad ontrack equi prent, si gnals, track and/ or track structures, and roadbed.
(c) Any event arising fromthe operation of a railroad whi ch results in:
(i) death of one or more persons;
(ii) i nj ury to one or more persons, ot her than railroad empl oyees, requiring medi cal treat ment;
(iii) injury to one or more empl oyees requiring medi cal treatment or resulting in restriction of work or motion for one or more days, one or more lost work days, transfer to another job, termi nation of empl oyment or loss of consciousness;
(iv) any occupational ill ness of railroad empl oyee di agnosed by a physi ci an.

Annual Average Daily Traffic. An estimate of the annual average daily highway traffic in both traffic directions.

Acti ve UArning Devi ces. A warni ng system activated by an approaching train: gates, flashing lights, hi ghway si gnal, wiguags, or bells.

Car. A rail nay car designed to carry frei ght, rail road personnel, or passengers. Thi s incl udes boxcars, covered hopper cars, flatcars, ref rigerator cars, gondol a cars, hopper cars, tank cars, cabooses, stock cars, ventilation cars, and speci al cars. Al so incl udes on-track nai ntenance equi pnent.

Class I Railroad. A railroad with an annual gross operating revenue in excess of $\$ 250 \mathrm{milli}$ on based on 1991 dollars.

Comercial Power. A source of comercial power within $\mathbf{5 0 0}$ feet of a crossing.
Consist. On-track railroad equi pnent such as a train, loconotive, group of rail road cars, or a single railcar not coupl ed to another car or to a I oconoti ve.

Contractor Empl oyee. A person empl oyed by a contractor hi red by a railroad to perform nor nal mai ntenance work to railroad rolling stock, track structure, bri dges, bui I di ngs, etc.

Crossing Surfaces.

1. Sectional treated timber. Pref abricated units approxi natel y ei ght feet I ong, nade of treated ti mber, indi vidual ly installed, and renovable for nai ntenance and repl acenent purpose.
2. Full yood plank. A nood surface, ot her than sectional treated timber, covering the entire crossing area above crossties.
3. Asphalt. A surface over the entire crossing area or the area bet ween plants or other material which forns flange way openi ngs with or without single planks on the outside of running rails.
4. Concrete slab. Precast concrete slabs which are installed and i ndi vi dually renovable for nai ntenance and repl acenent.
5. Concrete pavenent. A continuous concrete surface over the track area whi ch cannot be renoved except by destruction of the surface.
6. Rubber slabs. Perforned rubber sections which can be installed and renoved indi vi dual ly for nai ntenance and repl acement.
7. Metal sections. Preforned sections of steel or other netal which can
be indi vi dual ly installed and renoved for nai ntenance and repl acenent.
8. Other netal. A crossing area compl eted with covered rails or other permanent metal materials in limited sectional units.
9. Unconsol i dated. Bal last or other unconsol idated materi al pl aced above the tops of crossties with or without planks on one or both sides of runni ng rail.

Dayl ight Train Mbvenents. Train novenents bet ueen 6 a.m and 6 p. m
Empl oyee. A person engaged in railroad oper ations who works for a railroad company in return for financial or other compensation.

Empl oyee Not On Duty. A railroad empl oyee who is on railroad property for a purpose connected with his or her empl oynent or with ot her railroad permissi on, but who is not engaged in rail operations for financial or other compensation.

Fatality. The death of a person resulting from an injury incurred during railroad operations or resulting froman occupational illness if death occurs within 365 days of initial diagnosis.

Highway- rail Crossi ng. A location where one or more railroad tracks intersect a publ ic or private thor oughf are, a si dewal $k$, or a pathway.

Highway Si gnal s. Train-acti vated hi ghway Iights (red-anber-green) that control hi ghway traffic over the crossi ng.

Loconotive. A self-propel led unit of on-track equi prent desi gned for novi ng ot her rail frei ght and passenger equi pnent on rail tracks, including sel fpropel led units.

Mai n Track. Any track ot her than auxiliary track that extends through railroad yards or bet ween stations and over which trains operate by tine-table and/ or train orders or the use of the track is governed by a si gnal system

Maxi mum Ti net able Speed. Maxi mumtrain speed pernitted over a crossi ng.
Nearby Intersecting Highway. A hi ghway intersection within 75 feed of the crossi ng.

Night Trai $n$ Mbvenents. Train novenents bet ween 6 p. mand 6 a. m

Non-trai n Inci dent. An event arising fromrailroad operations but not fromthe novenent of on-track equi pment, which does not exceed the reporting threshol d, and results in a death, a reportable injury, or a reportable occupational i I I ness.

Nontrespassers. A person who is laufully on any part of railroad property which is used in railroad operations or a person who is adj acent to railroad premises
when $\mathrm{i} \mathbf{n j}$ ured as a the result of railroad operations.
Number Of Crossbucks. Masts with crossbucks; a nast with tho or nore crossbucks is counted as one. A crossbuck on an active device is not counted.

On-Track Equi pment. Railroad rolling stock used to transport frei ght or passenger. It incl uded I oconoti ves, rai I road cars, nai nt enance equi pment, and one or more loconoti ves coupl ed to one or more cars.

Other Si gns. Si gns other than crossbucks or stop signs.
Other Stop Si gns. Stop signs ot her than standard hi ghway stop signs.
Passenger. A person who is on, boarding, or alighting froma railroad car for the purpose of travel, without participating in its operation.

Passi ve Uarning Devi ce. A warni ng system not autonatically acti vated by an approaching trai n: si gns (crossbucks or standard hi ghway signs) or special warning devi ces (manually operated gates, flood Iights, etc.).

Pavenent Markings. Markings prescribed or generally similar to those in hi ghway traffic manual s, in particul ar, stoplines and railroad crossing symbol s.

Percentage Trucks. The percentage of total daily hi ghway traffic represented by trucks.

Public Crossing. A location open to public travel where railroad tracks cross a road that is under the $\mathbf{j u r i s d i c t i o n ~ a n d ~ n a i n t e n a n c e ~ o f ~ a ~ p u b l i c ~ a u t h o r i t y . ~}$

Rai Iroad. Any surface transportation system whi ch carries passengers, goods, naterials, or property over rails.

Rai I road Advance Whrni ng. Advance warni ng si gns on any hi ghway approach.
Rural Crossing. A crossing cl assification derived fromthe Functional Cl assification Code.

Si gnal s For Train Operation. Autonatic signal s or interlocks which control train operations in the vicinity of a crossing.

Snal lest Crossing Angle. The snallest angle bet ween the hi ghway and the track.
Speci al Warning Devi ces. Non-train-acti vated devi ces ot her than signs incl uding manually operated gates, train creus flagging a crossing, watchmen, and flood lights.

Speed Sel ection For Trains. A unif orm warning time for the speed range of trains normally encountered at the crossing.

Standard Highway Stop Sign. Octagonal red sign with whitelettering STOP.

Stop Si gns. The standard hi ghway stop sign or other stop signs.
Switch Trai ns. Al I trai ns other than thru trains, includinglocal s, industrial runs, and switch engi nes.

Thru Trains. Trains whose primary responsibility is to nove cars over the road; they may have a limited number of pickups and setouts al ong the route.

Total Train Mbenents. Al train novenents for the reporting company and all ot her railroads operating over the crossi ng.

Traffic Lanes. Number of hi ghway traffic lanes not incl udi ng shoul ders or parki ng lanes.

Train Acci dent. A collision, derailnent, or ot her event invol ving the operation of railroad on-track equi pnent resulting in danages that exceed the reporting threshol d.

Trai n Inci dent. Any event invol ving the novenent of rail road on-track equi pment that results in a death, a reportable injury, or a reportableillness, but in whi ch railroad property damage does not exceed the reporting threshol d.

Trespasser. Any person whose presence on railroad property used in railroad operations, is prohi bited or unl auf ul.

Truck Pullout Lane. A speci al I ane desi gned to accommodate vehicles which are requi red to stop at a crossi ng.

Type of Devel opnent.

1. Open space. An area that is undevel oped, sparsel $y$ devel oped, very lightly populated, or agricultural.
2. Residential. An area comprised of private residences.
3. Commercial. An area with retail stores, busi nesses, offices, and personal service offices.
4. Industrial. An area with manuf acturing, construction, heavy products, factories, and warehouses.
5. Institutional . An area with school s, churches, hospitals, parks, and other commity facilities.

Urban Crossi ng. A crossing cl assification deri ved from Functional Classification Code.

Whrni ng Devi ce Category. At crossi ngs whi ch have nore than one warni ng devi ce, the warning category is determined by the foll owing net hod:

| Hi ghest | 8) | Gates $^{3}$ |
| :--- | :--- | :--- |
|  | 7) | FI ashi ng I i ghts |
|  | 6) | Hi ghway si gnal s, wi guags or bel I s |
|  | 5) | Speci al uarni ng devi ces |
|  | 3) | Stop si gns |
|  | 4) | Crossbucks |
|  | 2) | Other si gns |
| Lonest | 1) | No si gns or si gnal s |

When cantilevered flashing lights are categorized separately, they are ranked eighth and gates are ranked ninth.

## APPENDI X B

## REPORTI NG

FORMS

## FORMS

Three separate forns nay be requi red to properly report a hi ghway-rail crossi ng acci dent/i nci dent:

FRA F 6180-57 Grade Crossi ng Acci dent/ I nci dent Report
FRA F 6180-55 Rai I road I nj ury and III ness Summary
FRA F 6180-54 Rai I Equi pment Acci dent/I nci dent Report
For al l reportable hi ghway-rail crossing acci dents/incidents, Form FRA F 6180-57 must be submitted by the carrier whi ch has on-track equi pnent invol ved. If reportable casual ties result, they must be individually reported on Form F 618055. If the acci dent resulted in more than $\$ 6,300$ in danages to railroad ontrack equi pnent, si gnal s, track, track struct ures, or roadbed, Form FRA 6180-54 must al so be subnitted.

[^0]:    ENOD = Empl oyee not on duty
    NONT = Nontrespasser
    CONT $=$ Contractor empl oyee

[^1]:    Note: "Speci al " are crossi ngs protected by wat chmen or menbers of train crew.
    "Hwy Si g" = Hi ghway si gnal s, WW = W gwags.
